What's New in the AutoCAD?

Import 3D models from Sketchup, Solidworks, or

other AutoCAD-supported applications into AutoCAD and edit them. Assign and populate attributes from within Sketchup. (video: 1:08 min.) Markup Assist in AutoCAD can search for relevant attributes and apply them to 3D models. (video: 1:50 min.) Search Search finds existing objects and attributes within your drawing. Find linked and unlinked objects and attributes in all drawings on your system, as well as text, dimension, and filenames. (video: 1:22 min.) Extend the Search window to create a Global search and search from multiple drawings at once. If you select multiple drawings in the window, all objects and attributes from those drawings will be searched and the results will be displayed in a separate window. Clipboard History Create a multi-drawing clipboard that you can use in all drawings. Copy and paste drawings and objects from one drawing to another. (video: 1:44 min.) Transferring elements from one drawing to another is an important part of many AutoCAD jobs. The Clipboard History window remembers your past

selections and makes it easy to copy and paste drawings, blocks, lines, polygons, arcs, text, and attributes. You can transfer elements directly from the clipboard to a drawing. Onscreen Text Quickly add and format text to your drawing. The Onscreen Text window makes it easy to enter text, add text formatting, and apply fonts. (video: 1:07 min.) Extend the window to create a Windows-like dialogue box. The Onscreen Text window also saves your settings and makes them available in every drawing. (video: 1:08 min.)

Design Templates

Design Templates are identical to the Document template in previous AutoCAD versions. Design Templates save your drawing settings to an object that you can reuse in your drawings. (video: 1:24 min.)
