SMARTSPY is a powerful and free tool to easily protect your digital life. You can run SMARTSPY on your web browser to scan your e-mails, instant messages and Web sites for malicious code, as well as identify spyware and other security threats. SMARTSPY offers end-to-end encryption with 128-bit Blowfish cipher, Advanced Encryption Standard (AES) and Twofish algorithms. SMARTSPY protects you from prying eyes such as hackers, identity thieves and foreign governments. SMARTSPY enables you to: \* Detect spyware, adware, and other forms of malware: SMARTSPY scans through your computer and mobile devices to detect, classify, and purge all forms of malware. To help reduce false positives, all files that are scanned for potential threats are tested and run in SMARTSPY's sandbox. \* The great value proposition: If SMARTSPY flags any threat, SMARTSPY provides detailed information and a quick and easy removal. The removal process also removes dangerous files and registry keys, allowing you to restore your files to their original condition. \* Optional detection of threats: For an additional fee, SMARTSPY can be configured to detect additional threats that aren't included in the free version, such as RAT (Remote Access Trojan) tools and hacking tools. \* View all alerts generated by SMARTSPY: The Get Alerts tool allows you to review all your data, as well as your security settings and configuration options, in real-time. \* The most advanced antispysware scanning and removal engine available: SMARTSPY uses 128-bit Blowfish, AES and Twofish algorithms to detect and remove malware. \* Simultaneous scanning of all your devices: You can specify the number of devices to scan and the number of devices you want to scan simultaneously. \* Effective communication: SMARTSPY can detect, classify and report spyware and malware, and connect to a number of resources to help educate you about and protect against spyware, malware and other online threats. \* Fast scanning: SMARTSPY automatically scans all files as you work, providing you with an instant, up-to-date view of all threats. SMARTSPY ( is a free, open-source, web-based application that detects and

## **SlimCleaner Plus**

SlimCleaner Plus is a comprehensive and reliable software solution that is designed to assist users in removing junk files, improving PC performance, cleaning Windows registry and identifying potentially unwanted software. Because the program uses cloud technology, after it analyzes your PC, it provides you with recommendations based on researches from IT professionals and with advice on how to improve the performance and the security of your Windows. The application features a responsive and intuitive user interface. You can easily navigate through options and erase browsing data and addons, identify potentially unwanted startup items, clean unnecessary junk files and remove traces of activity history. The 'Dashboard' panel is the central hub from which you can monitor your system's overall status and access several utilities that help you optimize your computer and get all the detailed information you need to make critical PC maintenance decisions. The 'Cleaner' utility is designed to quickly erase unused junk files, obsolete registry items and other temporary folders that you don't use anymore. The third feature that the application comes with is the 'Optimizer' tool, which is an advanced system tweaking program that lists all the active programs and background processes and removes the ones you don't want to start anymore. Another feature that helps you erase all the unnecessary data from disks is 'Disk Wiper' that removes all the data from the selected hard disk, while protecting it against recovery by overwriting it with bytes of data. This way, you can secure all the sensitive information from being discovered by making it unreadable. What's more, you are able to reorganize data clusters in an efficient way by using the 'Defragger' tool. You can improve disk performance by reducing the amount of fragmentation effortlessly. All things considered, SlimCleaner Plus is an effective solution when it comes to managing and optimizing your hard disks, getting accurate reports of storage space usage for all your partitions and removing junk files and temporary folders from your computer.
