New English File Book Intermediate Book Download PDF For Free Learn English. if you would like to order your book at: Bookstore: Academia. Indigo Q. Can't run an external application (iTunes) from my C# app I'm trying to run an external application from my C# WinForms app. I started the iTunes and when I click on "Open iTunes" nothing happens. So I searched around the Internet and found a code which I don't understand and the code doesn't work either. I'm really confused about that. because if my code works, then iTunes should start. Here is my code: private void button1\_Click(object sender, EventArgs e) { string path = "C:\\Users\\Sebastian\\Desktop\\iTunes\\iTunes.exe";
