Player movement and on-ball actions appear to be much more fluid than their predecessors, with players using smart, dynamic animations to move more fluidly and accurately through various movements. Players also seem to have better sprint animations, with more smart, responsive visuals and more realistic body movement. FIFA Ultimate Team 17 has a sleek new look, with new card art, gameplay and card sharing features. Watch FIFA 17 gameplay here Watch FIFA 17 gameplay here Watch FIFA 17 gameplay here Watch FIFA 17 gameplay here This new PlayStation feature makes use of PS4 Pro’s ultra-high definition technology to “make every facet of FIFA feel more alive than ever before,” according to a Sony press release. This includes delivering “dual-screen options such as a second playing field overlaid on the main screen, and an abundance of player stats, statistics and visuals to analyse and break down.” Here’s a look at all the tweaks coming to FIFA 17: Dual screen gameplay With PS4 Pro’s additional power, we can play split-screen scenarios on two displays at the same time. This gives the game the ability to use larger, wider screens, producing an almost 75-inch experience, and simultaneously on both displays to produce a total experience of 150 inches. This also means players on the same team can actually see each other in more detail. It creates a more realistic experience that will really help players enjoy dual screen sessions. This includes the ability to not only have the game running on one display, but to overlay a second screen on top to create a dual screen experience on the TV. The first title to really do this was the PS4 version of Battlefield 4, but thanks to PS4 Pro FIFA is now the next game to get this feature. Stunning visuals PS4 Pro brings extremely high definition detail to consoles for the first time. The newly announced graphics capabilities help FIFA 16 deliver the most realistic football experience possible. PS4 Pro’s powerful graphics capabilities allow us to more easily create and add extraordinary detail and depth to every facet of the game – from stadium grounds to player hair and even second-screen, all of which will take your FIFA experience to an entirely new level. Real-world motion capture FIFA 19 captured the physical movements of more than 100 high-profile players in 34 days to include over 70 different body movements such as

### **Fifa 22 Features Key:**

- Passing and shooting get a massive upgrade with new dribbling, more intelligent off-the-ball action, and at-speed-dribbling (including a variation that plays out like a crossover) all making it easier to score. The new dribbling system also lets players uses their hips to turn, so dribbling becomes even more about intelligent running and taking advantage of the space around you.
- Counter-attack makes a powerful return, and provides a fresh angle to attack on the break or open up gaps to run at defenders. The AI also gets smarter, making it harder for players to accidentally give away the ball and making the world’s best players all look like world-beaters.
- New ball physics deliver new options. Players can now tackle during the second part of a controlled dribble, and the new ‘turn inside’ and ‘turn outside’ dribbles make it feel like you have more choice in how you use the ball.
- Creative moves such as Dodge Hoops and Pro Tackles provide the ability to creatively beat the best defenders in the Premier League.
- Intelligent settings that let you dial in the game for different needs. You can raise defensive pressure, make the player more convincing, or turn on free kicks from the open play system to make it easier to score.
